Amendments to the Claims

This listing of the claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-32.   (canceled).

33.   (currently amended)   ~~The~~ A production module authoring system, for use in a low bandwidth video system, ~~of claim 34, further~~ comprising ~~said low bandwidth video system including~~:

a computer having a display screen, memory, image files, video files, and audio files; and

a software application, residing in said memory, which presents a graphical user interface on said display screen that allows a user to use point-and-click operations to build a production module for use in said low bandwidth video system, said software application comprising: a director module residing in said memory; and said ~~a~~ production module, including a script module, an image module, an audio module, and a new effects module; wherein said director module (1) uses said image module, new effects module, and instructions in said script module to compute a series of real-time screen transitions; and (2) combines said real-time screen transitions with associated audio to render high quality digital video on said display screen.

34.   (canceled).

35.   (currently amended)   The system of claim ~~34~~ 33, wherein said graphical user interface comprises a file selection window for selecting said files, a preview window for previewing said files, and button bars for sequencing images and video into logical pages and for attaching audio and screen transition instructions to said logical page.

36.   (new)   The system of claim 35 wherein said software application is configured to receive said director module from a remote server over a network.

37.   (new)   The system of claim 33 wherein said software application is configured to receive said director module from a remote server over a network.
